13 December 2013

Dear Mrs Anderton

This report outlines your patient feedback from the Improving Practice Questionnaire (IPQ). Your results have been illustrated in tables and graphs with associated benchmarks where applicable. Details of score calculation and statistical methods have been provided to help you in the interpretation and understanding of your results. You will also receive an A4 poster summarising your results and a certificate of completion which you may like to display to patients to indicate that you value their views in order to inform positive change within your practice.

If you are carrying out this survey in order to help meet the requirements of the patient participation directed enhanced service (DES) for GMS contract, a guidance template for discussion of these local survey findings and an action plan have been included which may help facilitate discussions with your patient reference group (PRG).

The format of this report has been updated, which we hope will provide you with a clearer picture of performance.

We hope these results give you useful feedback as to how patients rated the practice and its service, and provide you with a basis for reflection. In order to enable us to improve our services we would be grateful if you could complete a feedback form using the following link:

<http://www.cfepsurveys.co.uk/questionnaires/feedback/default.aspx?psid=166561>

Please contact the office on 0845 5197493 or reports@cfepsurveys.co.uk if you require further information about your report.

Yours sincerely

Helen Powell
Survey Manager

Introduction

About the IPQ

The IPQ is a well-established questionnaire widely used in the UK.

Since 2004, over 3,000,000 patients have completed an IPQ providing valuable patient feedback to over 4,000 practices and over 16,000 health practitioners, many of these practices and health practitioners having completed the survey on more than one occasion.

Extensive published validation studies have established that the IPQ is a reliable and sensitive tool: accurately measuring patient satisfaction in designated areas and is sensitive to change - if the IPQ is carried out on more than one occasion any change in patient perception of service can be clearly and reliably monitored.

This report outlines the feedback that has been collected and analysed from a sample of your patients. Full explanation on how to interpret this information can be found in the report. We hope that this feedback is useful and a basis for reflection.

A sample of the IPQ questionnaire is included at the end of this report for reference.

About the benchmarks

Benchmarks are a useful guide as to how your practice performed in relation to all the practices who have carried out an IPQ survey. Benchmark data provided relates to either all practices or according to practice list size (the practice list size benchmarks displayed in this report are representative of your practice), as we have established this plays a part in scores achieved. However, it should be noted that other factors such as geographical location and clinical setting may also affect scores and benchmarks may not always be truly representative. Furthermore as it is not mandatory for a practice to carry out an IPQ survey, benchmarks provided are effectively based on data collected from a *volunteer* sample. Volunteer samples often perform better than an 'average' sample which could make the benchmarks provided artificially high.

Your feedback

From the report you will be able to clearly pinpoint areas where you scored well and also those areas where you might feel that improvements may be needed. However, it is advisable to take time to assimilate all the feedback and to avoid scanning the report and noting specific scores on which too much emphasis can be placed. In fact, the clearest reflection of patient satisfaction can often be seen in the frequency and distribution of patient ratings and in their written comments.

A page by page guide to the interpretation of your report has been incorporated in the supporting documentation at the end of this report which you may find useful.

Other useful information

Together with your report you will receive:

- An A4 poster: to enable you to share the results of your local survey with the patients in your practice.
- A 'Guidance template for discussion of local findings and action plan': completion of which may help you meet the requirements of the patient participation directed enhanced services (DES) for GMS contract, if required.

Your patient feedback

All written patient comments have been included in their entirety but details which could identify a specific patient have been removed to ensure anonymity.

Any comments about how this practice could improve its service?

- Have always found doctors very helpful and respectful toward myself and my family.
- You cannot improve on excellence.
- More patient, understanding staff when ringing for an appointment!
- None - this practice, its doctors and staff are always attentive and helpful even at difficult times. I feel lucky to be under their care.
- None as far as I can see.
- The nurse should be available more often.
- The staff should be provided with name badges.
- Excellent practice.
- An excellent practice.
- To ensure reception staff respect data protection and do not try to play 'doctor' by deciding if you need an emergency appointment when only the patient and doctor can assess.
- Same day appointments (non-emergency) hard to book as phone lines jammed. Spend long time getting through while trying to get kids to school.
- Ability to get an appointment has improved greatly. Overall a very well run practice.
- Excellent practice. I wouldn't go anywhere else.
- Overall my satisfaction with the practice was very good.
- I suppose the 8:15am appointment system. I have tried this on numerous occasions (ringing) at 8:15am only to be told all appointment have gone.
- Well satisfied and happy.
- Quicker times for appointments. Possible later opening times after 6pm? Once per week?
- Trying to get same day appointments sometimes difficult - constantly trying to get through from 8:15 and appointments usually gone by 8:20.
- None - all is excellent.
- My issues with appointments are mostly due to the fact I am a carer and have difficulty in attending as need to organise someone to be there at home when I'm out (for more urgent types of appointments).
- We have recently moved to this area and have very little experience of the practices but are very pleased with our treatment so far.
- I have always had excellent treatment from this practice.
- Waiting times for appointments.
- Can you clone the sisters then double the amount of people could be helped?

Your patient feedback

All written patient comments have been included in their entirety but details which could identify a specific patient have been removed to ensure anonymity.

Any comments about how the doctor/nurse could improve?

- Very good experience. Thank you.
- For me to be aware who my usual clinician is. I have never been given a usual doctor, it varies?
- None the doctors here are very good.
- Couldn't be improved. We are very lucky patients to have our doctors and practice.
- Doctors are extremely good, however, locums should not google symptoms in front of patients as leads to fear of incompetence.
- None - excellent.
- The Macrae doctors are excellent. They have been my GPs since I was a child and I would trust them with my own health and my children's health without question.
- None - quite excellent.
- I couldn't be happier with the service I have received over the years.

Details of score calculation

The score provided for each question in this questionnaire is the mean (average) value of all of the ratings from all patients who completed the question. It is expressed as a percentage - so the best possible score is 100%.

Example using data from your Q1 Opening hours satisfaction

Total number of patients responses = 104

Questionnaire rating scale	Poor	Fair	Good	Very Good	Excellent	Blank/spoilt
Number of ratings	0	5	30	35	32	2

Value assigned to each rating	0	25	50	75	100	n/a

$$\frac{(\text{number of Poor ratings} \times 0) + (\text{number of Fair ratings} \times 25) + (\text{number of Good ratings} \times 50) + (\text{number of Very Good ratings} \times 75) + (\text{number of Excellent ratings} \times 100)}{(\text{Total number of patient responses} - \text{number of blank/spoilt})} = \frac{(0 \times 0) + (5 \times 25) + (30 \times 50) + (35 \times 75) + (32 \times 100)}{(104 - 2)} = 7,450/102$$

Your mean percentage score for Q1 = 73%

Explanation of quartiles

In statistics a quartile is any one of the three values that divide data into four equal parts, each part represents ¼ of the sampled population.

Quartiles comprise:

Lower quartile, below which lies the lowest 25% of the data

The median, cuts the data set in half

Upper quartile, above which lies the top 25% of the data

Please note that the benchmarks presented in this report are based on data obtained from a volunteer sample of practices, and as such may be artificially high.

Question	Your mean score (%)
Q1 Opening hours satisfaction	73

Benchmark data (%)*				
Min	Lower quartile	Median	Upper quartile	Max
23	64	68	73	92

9541

*Based on data from 927 practices carrying out 1,326 surveys between April 2010 and March 2013 with 25 or more responses.

Supporting documents

Page by page guide to the interpretation of your report

Page 1

The frequency distribution table (table 1) shows the number of patient ratings from poor to excellent and the number of 'blank/spoilt' responses for every question (a blank response is where a patient did not respond to the question and a spoilt response is where more than one tick box option was chosen or if the questionnaire was defaced). If these values are added up, for any one question, this will equate to the total number of patients surveyed (shown in the top right hand corner of the page). This table clearly shows the degree of satisfaction patients have with each aspect of the practice considered. Please note the spread of the ratings. Are they widely spread or closely packed around one or two specific ratings? One or two higher or lower ratings can make a big difference to your mean percentage scores illustrated in tables 2 and 3.

Page 2

The mean percentage score and benchmark table (table 2) illustrates your mean percentage scores for each question calculated from the data in table 1. Each score is the mean (average) score calculated from valid patient ratings (i.e. not the blank/spoilt responses) expressed as a percentage (see score calculation sheet also in the supporting document section of your report). It has been established by our statisticians that the reliability of your patient feedback for any one question may be marginally reduced if less than 25 valid patient responses is achieved (this number can be determined from table 1). In the event that there are less than 5 patient responses, the corresponding score for the question will not be illustrated.

Your scores have been displayed in colour coded boxes to indicate how your score falls within the benchmark data (within the highest 25%, the middle 50% or the lowest 25% of all the mean percentage scores achieved by all practices in the benchmark sample). The provenance of the benchmark data is provided in the footer below the table.

Graph 1 illustrates your mean percentage scores in ascending order of performance with benchmark means from all participating practices.

Page 3

Table 3 and graph 2 are the same as for page 2, but with benchmarks provided relevant to your practice list size. Evidence indicates that practices with smaller list sizes tend to perform better than those with larger list sizes.

Page 4

Table 4 shows the number of patient responses from each 'demographic' group detailed on the questionnaire i.e. age, gender, if the patient saw their usual practitioner or not and the number of years attending the practice. Demographic category mean percentage scores are calculated from all the ratings from all questions for that demographic group. Associated benchmark mean scores relevant to your practice list size are also provided.

The same criteria concerning reliability of the feedback as explained in Page 2 above applies.

Page 5

Table 5 lists your current scores for each question together with scores from your last 3 surveys (if applicable) for comparison.

Page 6

Patient comments usually reflect scores achieved. The IPQ was designed to simulate the patient's chronological journey through their visit to the practice. Although the questions in the IPQ are generic, comments can pinpoint specific issues identified by the patient from any part of this journey. If there is a particular problem within the practice e.g. getting through in the morning on the telephone or the lack of chairs in the waiting room suitable for the elderly, this can be clearly picked up in the themes and frequency of comments.

In order to ensure patient anonymity, any personal identifiers are removed. In the unlikely event that we receive a written comment which might relate to serious professional misconduct (e.g. allegations of sexual assault), the comment would be referred to our Clinical Associate who would discuss the matter with you.

Improving Practice Questionnaire

OFFICE USE ONLY	Org ID
	Survey ID
	Practitioner ID

You can help this general practice improve its service

- This practice would welcome your honest feedback
- Please read and complete this survey after you have seen the
- All the information provided by patients is put together in a report for the practice. Your answers will not be identifiable. Any comments you make will be included but all attempts will be made to remove information that could identify you.
- Once completed, please return this survey to reception in the envelope provided

Please mark the box like this with a blue or black ball-point pen. If you change your mind just cross out your old response and make your new choice.

When giving your feedback, please only consider the consultation you have had today.

About the practice

	Poor	Fair	Good	Very good	Excellent
1 Your level of satisfaction with the practice's opening hours	<input type="checkbox"/>
